

### **Ways to Help Your Student At Home #3 Preparing for College Admission**

- Talk to your student regularly about his/her progress toward reaching the goal of attending a four-year university. Ask for periodic updates on his/her Six-Year Plan to learn how your student is doing in the following areas:
  - Meeting high school graduation/college eligibility requirements
  - Participating in extracurricular activities
  - Preparing for college admissions tests
  - Doing research on financial aid
- Communicate with the AVID teacher, subject area teachers, counselor(s)/other relevant advisors regarding your student's progress and any questions/concerns you have.
- Keep a record of important dates (tests, deadlines, etc.).
- Be enthusiastic and supportive. Take pride in your student's accomplishments.
